Information/purpose:

5.6.1.1 Google Ads Conversion

We use the services of Google Ads to draw attention to our attractive offers with the help of advertising materials (so-called Google Ads) on external websites. We can determine in relation to the data of the advertising campaigns how successful the individual advertising measures are. We are interested in showing you advertisements that are of interest to you, to make our website more interesting for you and to achieve a fair calculation of advertising costs.

The advertising materials are delivered by Google via so-called “Ad Servers”. For this purpose, we use ad server cookies, through which certain parameters for measuring success, such as the insertion of ads or clicks by users, can be measured. If you access our website via a Google ad, Google Ads stores a cookie on your device.

These cookies usually expire after 30 days and are not intended to identify you personally. For this cookie, the unique cookie ID, number of ad impressions per placement (frequency), last impression (relevant for post-view conversions) and opt-out information (mark that the user no longer wishes to be addressed) are usually stored as analysis values.

These cookies enable Google to recognize your Internet browser. If a user visits certain pages of an Ads customer's website and the cookie stored on their device has not expired, Google and the customer can recognize that the user has clicked on the ad and has been redirected to this page. Each Ads

customer is assigned a different cookies. Cookies cannot therefore be traced via the websites of Ads customers. We do not collect and process any personal data in the aforementioned advertising measures. We only receive statistical evaluations from Google.

On the basis of these evaluations we can recognize which of the used advertising measures are particularly effective. We do not receive any further data from the use of advertising material; in particular, we cannot identify users on the basis of this Information.

Due to the marketing tools used, your browser automatically starts a direct connection to the Google server. We have no influence on the extent and the further use of the data which are raised by the use of this tool by Google and inform you therefore according to our knowledge: By the integration of Ads conversion Google receives the information that you called the appropriate part of our Internet appearance or clicked an announcement of us. If you are registered with a Google service, Google may associate your visit with your account. Even if you are not registered with Google or have not logged in, it is possible that the providers may obtain and store your IP address.

5.6.1.2 Google Ads Remarketing

Remarketing helps us to show ads to users of our website, based on their interests on other websites within the Google advertising network (in Google search or on YouTube, so-called "Google ads" or on other websites).

To let us use this feature, Google stores cookies in the browsers of users who visit certain Google services or websites in the Google Display Network. This cookie is used to record the visits of these users. The number is used to uniquely identify a web browser on a particular device.
